# Distributed Hash Table Theory Platforms And Applications Springerbriefs In Computer Science

**asurveyondistributedhashtable(dht):theory, platforms ...** - nowadays distributed hash table (dht) [1, 2] plays an important role in distributed systems and applications, especially in large-scale distributed environments. in the normal client/server model **oht: hierarchical distributed hash tables - datasys.iit** - oht: hierarchical distributed hash tables . kun feng, tianyang che, tonglin li, ioan raicu . department of computer science illinois institute of technology {kfeng1,tche,tli13}@hawk.iit, iraicu@cs.iit . abstract. this paper presents oht, a hierarchical distributed hash table, which improves the performance of practical zht. when n-to-n connection is needed, every single node has to ... **decentralization of a multi data source distributed ...** - distributed hash table (dht) is an approach that allows data to be located in the fully distributed system, based on the data's identification number or content. **a real-time distributed hash table - arcbsu** - storage system, a real-time distributed hash table (dht), to store and retrieve this monitoring data as a real-time service to an upper layer decentralized control system. **weighted distributed hash tables - researchgate** - distributed hash tables are commonly based on consistent hashing [9] scheme or on the work of plaxton et al. [13]. usual distributed hash tables includes can[15], chord[16], **content-based addressing in hierarchical distributed hash ...** - the distributed hash table (dht). these peers use this structure to act as equals in a network, these peers use this structure to act as equals in a network, sharing the same responsibilities of maintaining and contributing. **comparing upc and one-sided mpi: a distributed hash table ...** - comparing upc and one-sided mpi: a distributed hash table for gap c.m. maynard epc, school of physics and astronomy, university of edinburgh, jcmb, kings buildings, mayfield road, edinburgh, eh9 3jz, uk **leveraging a compound graph based dht for multi-attribute ...** - distributed hash table (dht) has been applied to grid systems as a distributed mechanism for providing scalable range-query and multi-attribute resource discovery. **algorithms and performance of load balancing with multiple ...** - the file into the distributed hash table. more specifically, a hash more specifically, a hash function is first applied to the file (e.g., the file name) and the **performance analysis of identifier locator separating ...** - architectures by using a distributed hash table. mofi is a host-based mobility protocol and operates over traditional network environments, whereas nhils is a network-based protocol and operates in software defined networks (sdn). in this paper, we present the cost model of each mofi and nhils, and conduct performance analysis for comparison. from numerical results, impact factors are ... **compositional programming and testing of dynamic ...** - we compare the performance of the hash-table distributed service against its open-source counterpart by benchmarking it on a cluster. to summarize, this paper makes the following novel contributions: 1. we present a new theory of compositional refinement and a module system for the assume-guarantee reasoning of dynamic distributed systems; 2. we implement a programming framework, modp, that ... **research on effective and intelligent resource management ...** - agents, small-world network theory and distributed hash table, the intelligence, self-adaptability, robustness, performance and efficiency of internet resource management and scheduling can be greatly improved. **resource authentication management model based on ca and ...** - ring (lcr for short) according to the theory of distributed hash table. that is to say, the agent that is to say, the agent of lada is a member of the lcr and is the entrance and interface of the local area domain **ieee surveys - university of cambridge** - tems use the distributed hash table (dht) as a substrate, in which data object (or value) location information is placed deterministically, at the peers with identifiers corresponding to the data object's unique key. dht-based systems have a property that consistently assigned uniform random nodeids to the set of peers into a large space of identifiers. data objects are assigned unique ... **cs168: the modern algorithmic toolbox lecture #1 ...** - figure 2: each element of the array above is a bucket of the hash table. each object x is assigned to the rst server s on its right. figure 3: (left) we glue 0 and 232 1 together, so that objects are instead assigned to the
